About Redbank Copper

Redbank Copper is an Australian based ASX-listed resource company (ASX: RCP) focused on the development of the Redbank Copper Mine in the north east of the Northern Territory.

The project is located in the Redbank Mineral Field in the NT, where the Company holds a substantial ground position. The region hosts significant economic copper mineralisation and is highly prospective for copper, cobalt, phosphate, manganese and uranium.

The Company acquired the Redbank Copper Mine in 2005. The tenement package included an established resource base, numerous advanced copper targets and processing infrastructure. Redbank has an exploration program underway to expand its resource base, and is developing the project toward recommencement of production, in line with the Mine Study released in September 2009.

Redbank also has an exploration joint venture with Glencore International, one of the world's largest commodity suppliers. The Company has also signed an off-take agreement with Glencore for the life of mine, based on marked based spot prices of copper. Additional information is available at www.redbankcopper.com.au
