

Environmental Policy

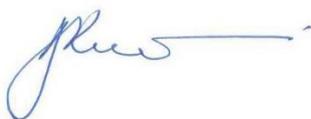

Environmental Policy

Redbank is committed to the responsible management and protection of the natural environment at all stages of its business. Redbank aims to manage its use of natural resources in a way that demonstrates environmental stewardship. We are committed to maintaining the highest level of integrity in our responsibilities toward resource development and the environment.

Redbank aims to operate responsibly and demonstrate environmental stewardship by:

- complying with all applicable laws, regulations and commitments;
- having effective environmental management systems (including incident reporting processes) which enable us to manage, mitigate and report on risk;
- supporting an environmentally responsible culture;
- striving to continually improve the efficient and responsible use of natural resources;
- managing air emissions, waste generation, and pollution created as a result of our activities;
- respecting climate change as a global issue and participating in solutions that address the impacts of climate change, particularly through the implementation of renewable energy options where applicable;
- using ground water responsibly and efficiently;
- protecting biodiversity by considering ecological values; and
- promoting an ongoing environmental dialogue by understanding, engaging and acknowledging the values and expectations of all stakeholders regarding all aspects of our business.

Environmental stewardship is the responsibility of everyone engaged in activities by Redbank and this policy applies to all employees, directors, officers, consultants and contractors of Redbank and its subsidiaries. The Managing Director of Redbank is accountable to the Board for ensuring that this policy is implemented and adhered to and any reportable environmental incidents are published by the Board and actions taken to minimise impacts to the environment.

Dated 23 June 2021

Tony Kiernan
Non-Executive Chairman
